Reviews

"Very professional doctor!"

"Excellent doctor,great humanitarian.I have not yet met any other Doctor like him who takes so much personal care of the patients."

"He is very supportive and suggest well. Good surgeon known from past 10 years. My mother was a renal transplant patient but in most risky condition he treated her in day care procedure and avoided hospital admission .Apollo is really fortunate to have a good surgeon like him. We cannot imagine our life with out him."

"He is very good doctor, dedicated towards his proffetion and always cares his patients.A patient can freely interact with him,gives sufficient time to the patient to express their health issues. The way he handles the patient is very much impressive. He recommends surgery only when it is really required. Overall very rare kind of metal among present generation doctors."
